#157.7

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the application of: J. Don Chen

Serial No.: 09/041,994

Filed: March 13, 1998

For: A Transcriptional Coactivator of Stered Nuclear

Receptors and Uses Therefor

Attorney Docket No.: UMG-026 (formerly UMM-026)

Group Art Unit: 1646

Examiner: M. Pak

Assistant Commissioner for Patents Washington, D.C. 20231

Certificate of First Class Mailing (37 CFR 1.8(a))

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Assistant Commissioner for Patents, Washington, D.C. 20231 on the date set forth below.

Attorney for Applicant

DECLARATION UNDER 37 C.F.R. 1.131 BY DR. J. DON CHEN AND DR. HUI LI

Dear Sir:

We, Dr. J. Don Chen, a citizen of Taiwan, and Dr. Hui Li, a citizen of The People's Repblic of China, both residing in the United States, hereby declare as follows:

1. We are co-inventors of the subject matter described and claimed in the above-identified application.

2. Prior to August 5, 1997, the invention described and claimed in the above-referenced application was completed in this country, as evidenced by the following:

- 2 -

A. Prior to August 5, 1997, we, as co-inventors, isolated a full-length human RAC3 cDNA, determined the nucleic acid sequence of the full-length RAC3 cDNA and derived the human RAC3 amino acid sequence from the RAC3 nucleic acid sequence. The biological activity of RAC3 as a steroid/nuclear receptorassociated coactivator was also determined. We described the full-length RAC3 amino acid sequence and it's biological activity in a manuscript entitled "RAC3, a steroid/nuclear receptor-associated coactivator that is related to SRC-1 and TIF2", which was published in The Proceedings of the National Academy of Sciences, USA on August 5, 1997. Each of these events is evidenced by a copy of the above-described manuscript (Li et al. (1997) Proc. Natl. Acad. Sci. USA 94:8479-8484) which is attached hereto as Appendix A, pages A-1 to A-6. We also deposited the full-length RAC3 nucleic acid and amino acid sequences with the GenBank[™] sequence database at the National Center for Biotechnology Information (NCBI) prior to August 5, 1997, as evidenced by the attached printout of GenbankTM Accession No. AF010227 (the RAC3 nucleic acid sequence) and AAC51663 (the RAC3 amino acid sequence). Copies of these GenBank[™] records are attached hereto as pages A-7 through A-9 and pages A-10 through A-11 of Appendix A.

Thus, the manuscript and GenBankTM Accession Records submitted as pages A-1 through A-11 of Appendix A demonstrate that we had successfully isolated, sequenced, characterized and described human RAC3 nucleic acid and protein molecules, prior to August 5, 1997.

We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the

like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Art Unit: 1646

We are also co-authors with Paulo J. Gomes of an article entitled "RAC3, a 2. steroid/nuclear receptor-associated coactivator that is related to SRC-1 and TIF2" which was published in Proc. Natl. Acad. Sci. USA, vol. 94:8479-8484 (1999), hereinafter, "Li et al."

The work described by Li et al. is Applicants' own work. In addition, to the 3. extent that the work described by Li et al. falls within the scope of the claims in the aboveidentified application. Paulo J. Gomes provided only technical assistance.

We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
